FREE CHECK · PAGE 1: FIND AND PRICE THE JOB

For owners & ops leads at UK services firms of 20 to 200 people

The AI Agent Payback Check: find the one job worth automating first

Most UK services firms have one repetitive job that quietly eats a person's week. This check helps you find that job, price what it costs you each year, and see whether it is a good fit for an AI agent.

You need: Your own headcount and a rough loaded hourly cost for the person who does the work today. No confidential records leave your business.

1. Tick the recurring jobs that eat time

- ☐ Quotes and proposals
- ☐ Invoice matching
- ☐ Inbox triage
- ☐ Re-entering data between systems
- ☐ Client reports
- ☐ Chasing (invoices, info, approvals)
- ☐ Onboarding (clients or staff)
- ☐ Other (write it in)

2. Price each ticked job

Hours a week x loaded hourly cost x 52, then add the yearly cost of errors or delays.

Job (tick one or more)	Hours / week	Loaded hourly cost	Errors or delays / year	Yearly cost (hours x 52 x rate + errors)

This check is a rough internal estimate from your own figures. It is not a quote, a savings promise or advice. Loaded cost and error cost are your judgement; treat the yearly figure as a starting point for a conversation, not a business case.

PAGE 2: SUITABILITY, TOP JOB, NEXT STEP

For owners & ops leads at UK services firms of 20 to 200 people

Pick the one job worth automating first

FICTIONAL EXAMPLE · FIRM E (FICTIONAL)

This organisation and every figure on this example are invented to show the method. They are not typical results, averages or benchmarks. Your own figures will differ.

Job	Hours / week	Loaded rate	Errors / year	Yearly cost
Quotes and proposals	8	£45	£2,000	£20,720
Client reports	6	£45	£500	£14,540
Inbox triage	10	£35	£0	£18,200
Re-entering data between systems	5	£35	£1,200	£10,300

Top job by yearly cost (fictional)	Quotes and proposals · £20,720
Suitability (fictional)	Rule-based, digital inputs, weekly
What we'd scope on a call	**Whether an agent could draft first-pass quotes from your CRM**

Every figure on this page is invented to show the method. Your own numbers will differ.

3. Suitability check (for your top one or two jobs)

Is the job rule-based?
Can you write the steps down, or does every case need fresh judgement?

Yes | Partly | No

Are the inputs digital?
Do they live in email, spreadsheets, a CRM or another system you can access?

Yes | Partly | No

Does it happen often?
Weekly or more, not a rare one-off.

Yes | Partly | No

Your top job (the one with the highest yearly cost that also passes the suitability check):

Next step: a free 15-minute call to check whether an AI agent could take that job on, and what it would take to build it.

If the check points to a clear top job, we can scope a productised AI agent for it on a short call.
